a **Default, Decline and GPC on the same stores**

233 stores where the Decline click worked; fresh page, 10 s window

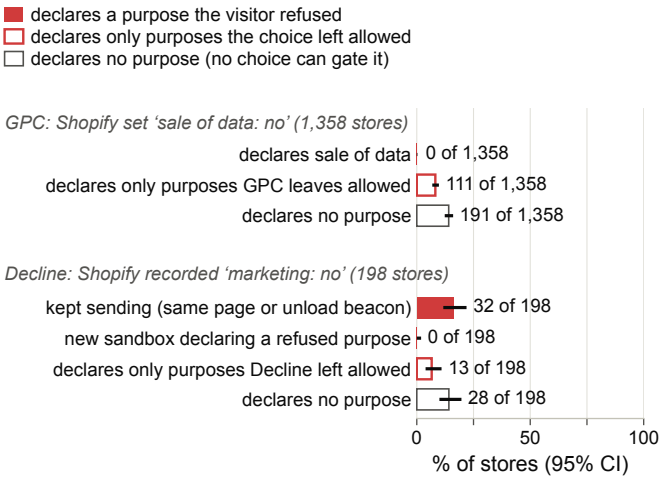

b **Pixels still firing after Decline**

a sandbox created on the next page sent an ad request

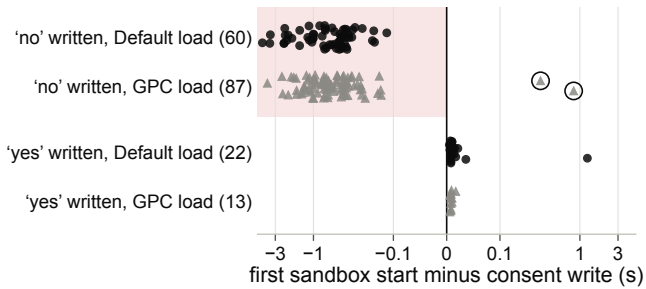

c **After Shopify records the refusal**

which sandboxed pixels still sent ad requests?

d **Race: CMP writes vs third-party pixels**

the CMP wrote to Shopify without a click; red: started before the 'no'

'no': 535 of 545 third-party 'marketing' sandboxes started first, 291 before Shopify's consent script was requested; ringed: the 2 loads whose first sandbox started after the 'no'. 'Yes': all 342 after.
