Banner stores: sandboxed pixel fires before any choice
main analysis
data beacons only (no library loads) (definition)
beacons carrying our test code only (definition)
any origin (not only sandbox) (definition)
crawl run at 6 browsers
crawl run at 10 browsers
excluding edge-cached pages
only pages with a California consent string
adding banners missed by the detector (re-check)
Consentmo + shouldShowBanner() counted as banner
excluding stores flagged in the ethics review
weighted to the Tranco top-200k (ratio estimator)
cluster bootstrap by consent tool (BCa) (interval only)

Working Decline clicks: a new sandbox fires on the next page
main analysis (next page, fresh sandboxes)
data beacons only (no library loads) (definition)
any time after the click (same or next page) (definition)
next page, any sandbox (definition)
including the failed forced clicks
crawl run at 6 browsers
crawl run at 10 browsers
excluding all forced clicks
excluding stores flagged in the ethics review
weighted to the Tranco top-200k (ratio estimator)
cluster bootstrap by consent tool (BCa) (interval only)

Stores with a Default sandboxed pixel: still fires under GPC
main analysis
data beacons only (no library loads) (definition)
beacons carrying our test code only (definition)
first 10 s of each load
crawl run at 6 browsers
crawl run at 10 browsers
excluding edge-cached pages
excluding stores flagged in the ethics review
pixels declaring sale of data only (definition)
any origin (not only sandbox) (definition)
weighted to the Tranco top-200k (ratio estimator)
cluster bootstrap by consent tool (BCa) (interval only)
