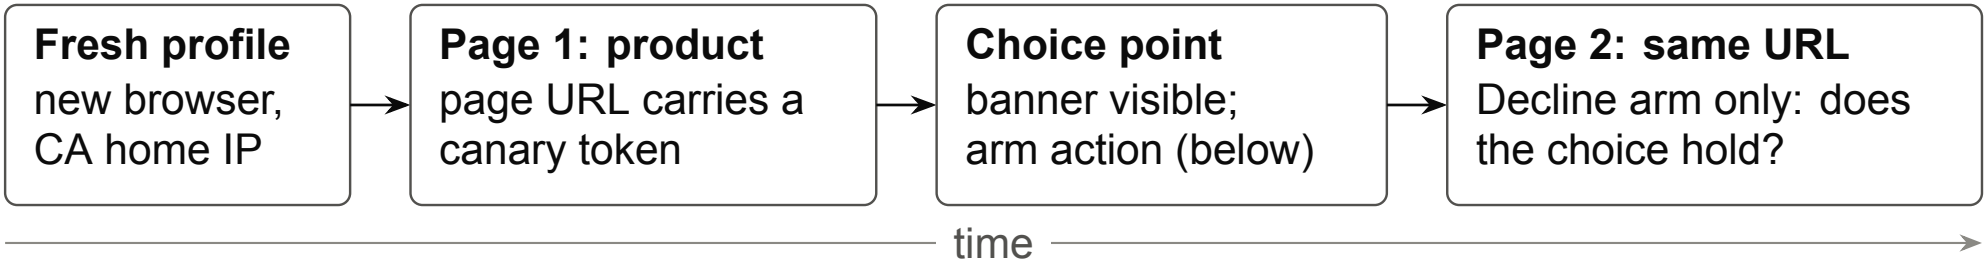
b Three base arms plus validation loads



Arm	GPC signal	Action at the choice point	Question it answers
● **Default**	off	none (banner ignored)	Do pixels fire before any choice?
□ **Decline**	off	click Decline / Reject (never Accept)	Does Decline stop them?
▲ **GPC**	emulated: header + flag in all frames and workers	none	Does GPC stop them?
◇ **Repeat**	as in the arm it repeats	none; Default and GPC re-run (287 planned, 274 usable)	How much do single loads vary?
◇ **Brave**	native, Brave browser	none (100 planned, 99 usable)	Does emulated GPC match native GPC?
